SKILLS

HTML   CSS   JavaScript   React.js
Node.js   Express.js   MongoDB   Chakra Ui
Github

PERSONAL PROJECTS

Weather App
- **Technologies: *HTML, CSS, JavaScript, Weather API.***
- Built a web application that displays real-time weather data using a public Weather API.
- Enabled location-based weather search with dynamic data rendering using JavaScript.
- Designed a responsive and clean user interface using HTML and CSS.
- Implemented error handling for invalid inputs and API response issues.

Library Management System
- ***Technologies: React.js, Node.js, Express.js, MongoDB (MERN Stack)***
- Developed a full-stack web application to manage library operations such as book inventory, member registration, and issue/return tracking.
- Implemented user authentication, role-based access (admin/user), and secure RESTful APIs using Node.js and Express.js.
- Built a responsive front-end with React.js for seamless user interaction and real-time updates.
- Utilized MongoDB for efficient storage and retrieval of book and user data with Mongoose ODM.

Personal Portfolio
- ***Technologies: React.js, MongoDB***
- Created a responsive personal portfolio to showcase projects, skills, and contact information using React.js.
- Designed a clean and modern UI with interactive components for a smooth user experience.
- Integrated MongoDB to manage dynamic content such as project details and contact form submissions.
- Implemented routing and component-based architecture for maintainability and scalability.
